Use of Immunofluorescence to Detect the Appearance and Evolution of Vaccinal Antigen in Cell Cultures."

Bucharest, Studii si Cercetari de Inframicrobiologie, Vol 17, No 5, 66, pp 359-363.

Abstract: A direct immunofluorescent technique was used to demonstrate the presence of vaccinal virus in human embryo fibroblastic cells, HeLa cells and KB cells. The fluorescent antigen appeared in HeLa cells 6 hours after infection and in the other two types of cells 8 hours after infection, i.e., earlier than histopathologic changes which appear after 12 to 18 hours. The infectious virus was found 18 hours after inoculation and hemagglutinating properties after 48 hours. Includes 4 figures and 15 references, of which 8 Rumanian, 2 Russian and 5 Western. -- Manuscript submitted 4 June 1966.

Title : Polytechnical Training in the Study of Biology.

Orig Pub : Prirod. vedy skole, 1956, 6, No 3, 227-233

Abst : It is suggested that the extent and depth of the knowledge imparted to students in biology lessons and applied in practice be defined accurately. It is noted that, at present, textbooks for the VIth and VIIth grades contain superfluous technical details that students may learn through direct practical experience on field trips. It is important that biology lessons be complemented through the familiarization of students with features of large-scale farming, such as cooperative fields, orchards, and truck farms, as well through work in Michurin clubs. It is recommended that the theoretical part of the studies

A-7

Abs Jour : Ref Zhur - Biologiya, No 7, 10 April 1957, 25780

be kept separate from the practical, that field trips be prepared more carefully, so as to make them useful in subsequent training. Considerable importance is attached to the showing of scientific motion pictures and to well planned reading program of special literature outside of school.

Warsaw, Polski Tygodnik Lekarski, Vol 13, No 3, 7 Jan 63, pp 45-47.

Abstract: [Authors' English summary modified] Two cases of DCH poisoning are described, one following working with the powder in antisanitary conditions and the other following long exposure to fumes of its isomeric form. The general signs of intoxication were accompanied by signs of acute meningoencephalitis, and in the first case also of spastic hemiparesis. Meningeal and Babinski signs disappeared two days following onset of disease, and moderate pleocytosis was stated in the cerebrospinal fluid for some time. Of the 19 references, 2 are English, 4 German, 6 Eastern Bloc, and 7 Polish.

SOV/112-58-2-2753

Translation from: Referativnyy zhurnal, Elektrotekhnika, 1958, Nr 2, p 151 (USSR)

AUTHOR: Strumilin, S. G.

TITLE: Tasks of the Economic Sciences in the Field of Automation of Production Processes (Zadachi ekonomicheskikh nauk v oblasti avtomatizatsii proizvodstvennykh protsessov)

PERIODICAL: V sb.: Sessiya AN SSSR po nauchn. probl. avtomatiz. proiz-va, 1956, Plenarn. zasedaniya. M., AS USSR, 1957, pp 215-233, discussion pp 251-261

ABSTRACT: Automation and mechanization of production pose the economic sciences a number of complicated problems associated with the general task of increasing labor productivity. These are as yet inadequately illuminated by economic science. To this day, a measure of the relative efficiency of various methods of automating and mechanizing labor has never been found. The fundamental problems comprise: study of the practical adoption of automation in the USSR and abroad, and its economic efficiency under various production

Card 1/2

SOV/112-58-2-2753

Tasks of the Economic Sciences in the Field of the Automation of Production . . . .

conditions and in various branches of work; development of methods for determining the efficiency of capital investment in new technology. A comparison of statistical data is presented on the development of automation in the USSR and abroad. A difference in the adoption of automation under socialistic and capitalistic economic conditions is noted.

"Treatment of Post-operative Infected Wounds with Phages."

Warszawski Polski Tygodnik Lekarski, Vol 10, No 12, 18 Mar 63,  
pp 14-15, 32.

Abstract: [Authors' English summary] Authors analyze the  
results of treatment with phages of infected post-operative  
wounds (50 patients). Both clinical and bacteriological  
good results obtained in 35 patients; there were 10 patients  
with no clinical effects, and 5 with negative bacteriologic  
results. Authors suggest phage treatment for cases resist-  
ant to antibiotic treatment, with aerosol application direct-  
ly on the wound as best method of administration. Of the 8  
phage types, 3 are Polish and 5 Western. ....

Title

: Investigation of the Utilization of Trichloroethylene  
in the Azeotropic Dehydration of Acetic Acid.

Oris Pub

: Przemysl Chem, 13, No 8, 442-444 (in Polish with  
summaries in English and Russian), 1957

Abstract

: In order to study the feasibility and economics of the  
dehydration of  $\text{CH}_3\text{COOH}$  with trichloroethylene (I) the  
authors have determined experimentally the equilibrium  
curves for the systems I- $\text{CH}_3\text{COOH}$  and azeotrope (I-water)-  
 $\text{CH}_3\text{COCH}_3$ . A schematic diagram of the apparatus is inclu-  
ded and the experimental method used is described.  
The length of packed fractionation column corresponding  
to the transfer of a unit mass for the system

Poland, No 9, 1953, 29693

azeotrope- $\text{CH}_3\text{COOH}$  was determined; the ratio of that  
length to the corresponding length for the system  
 $\text{C}_2\text{H}_5\text{OH}$ -water, in which it is small compared to other  
binary systems, was found to be 1.41.  
The authors therefore conclude that the azeotropic  
dehydration of  $\text{CH}_3\text{COOH}$  with I is feasible using a  
relatively inefficient column.

ABSTRACT JOUR.	:	RZKhim., No. 73 1959, No. 82521	
AUTHOR	:	Michalski, H.; Strumillo, G.; Szapiro, S.	
TYPE	:	-	
TITLE	:	Determination Method of Packing Height in Rectifying Columns	
ORIG. PUB.	:	Zesz. nauk. Politechn. lodzkiej, 1957, No 16, 3-14	
ABSTRACT	:	A method for determination packing height is proposed which is based on the results of experiments conducted by the authors on a laboratory installation and suitable for cal- culations of commercial rectifying columns. A satisfactory correlation of data is establi- shed when employing factors obtained by the proposed method as well as data found by the others. A satisfactory correlation exists also with data obtained by the authors in their experiments with different packed colu- mns.
